MUTOKO RURAL DISTRICT COUNCIL

Detailed one-day curriculum

08:30–16:30 | Contract-aligned, practical and role-specific

One-Day Practical Training Programme | Mutoko, Zimbabwe

Development edition • 12 November 2026. Delivery and acceptance pending.

Contract, audience and measurable outcomes

The original ToR §§3.5 and 5 requires one working day in Mutoko for two ICT, three HR and two Finance participants, covering CMS, basic system administration, cybersecurity/data protection and ongoing maintenance. No additional days are assumed.

By close, each participant should demonstrate their eight track checkpoints, answer the 10-item post-test, locate their role reference and identify an escalation route. Access-blocked tasks remain pending. Proposed competency rule: 70/100 overall with critical safety checks satisfied, subject to Council approval.

Timetable: 08:30–16:30

Time	Session	Minutes
08:30–09:00	Registration, objectives and starting assessment	30
09:00–10:00	Public website, login and CMS navigation	60
10:00–11:15	Create, edit, upload and verify public visibility	75
11:15–11:30	Tea break	15
11:30–12:45	HR and Finance workflows with ICT support	75
12:45–13:30	Lunch	45
13:30–14:30	Accounts, cybersecurity and data protection	60
14:30–15:15	Maintenance, monitoring and troubleshooting	45
15:15–16:00	Individual practical and knowledge assessment	45
16:00–16:30	Evaluation, questions and handover	30

Total 480 minutes; tea 15 and lunch 45; 420 remaining minutes include registration, teaching, practice, assessment and handover. Shared and departmental guided-practice sessions together occupy 150 minutes; individual assessment occupies 45 minutes.

Readiness checklist and fallback

Gate	Required evidence	Owner
G1	Council provides an isolated training URL, sanitized data and rollback/cleanup owner; public production is read-only.	ICT / Council sponsor
G2	Seven named accounts are tested for each exercise; author, verifier and publisher rights and scope are recorded, including create-entry checks.	ICT / department owners
G3	External mail is disabled or routed to a controlled sink; no real citizen/personnel data or live AI calls are used.	ICT / facilitator
G4	Fictional PDFs/images, projector, power, seven workstations, reliable network and printed fallback worksheets are ready.	Facilitator
G5	Actual role screenshots are captured, checked for personal data and matched to the training build; pending screenshots remain clearly labelled.	Facilitator / ICT
G6	Council approves content review responsibilities, privacy escalation contact, support contacts and the proposed scoring rule.	Council sponsor
G7	ICT supplies redacted worker/cron/SMTP/backup evidence; missing evidence is discussed as a limitation, not demonstrated as operational.	ICT / hosting owner

Check gates before delivery. If G1 or G3 fails, do no system writes. If a particular permission or screenshot is unavailable, teach the source-verified sequence with the worksheet and record not demonstrated. Do not award practical completion for watching a demonstration. If gates cannot be resolved on the day, deliver the safe theory/observation components, log outstanding competence and arrange Council-approved remediation.

Facilitation: one facilitator with two ICT participants supporting navigation during guided practice only. Assess all seven individually. Use a projector plus seven devices; provide large-print PDFs and read questions aloud on request without giving answers. Pair practice, but score individually. No participant is appointed a trainer or assessor merely by being ICT staff.

S1 | 08:30–09:00 | Registration, objectives and starting assessment

Duration: 30 minutes. Target audience: All seven.

Learning objectives

Identify your assigned track and training-only URL; complete the 10-question baseline without assistance.

Topics covered

Attendance; four ToR subjects; safety boundary; evidence labels; baseline questions.

Teaching method and minute budget

Welcome 5 min; scope and introductions 5; pre-assessment 10; objectives and readiness check 10.

Live demonstration / verified fallback

Show the approved training address and the separate public production address. Do not log in to production.

Practical exercise

Enter participant ID on the blank register; identify ICT, HR or Finance track; complete pre-test.

Required materials

Attendance workbook, pre-test sheets, projector, environment checklist.

Expected competency

Participant can state where practice is permitted and what must not be published.

Assessment method

Baseline recorded only; no pass/fail or completion inferred.

S2 | 09:00–10:00 | Public website, login and CMS navigation

Duration: 60 minutes. Target audience: All seven.

Learning objectives

Locate a service, vacancy and public document; identify language fallback; locate the permitted CMS cluster and explain a missing menu.

Topics covered

Public modules; search; languages; accessibility controls; /admin/login; profile, password reset and MFA availability; six clusters; permissions/scopes.

Teaching method and minute budget

Public tour 15 min; login/navigation demo 15; paired navigation practice 20; teach-back 10.

Live demonstration / verified fallback

Use verified public screenshots or read-only public browsing. On isolated training only, show login, profile and one permitted menu.

Practical exercise

E1: Find a service and document, select a language, identify one accessibility feature and locate System Walkthrough.

Required materials

Public screenshots; approved accounts; manual W1–W3; screenshot pending cards for authenticated screens.

Expected competency

Each person finds three public items and distinguishes public reading from authorized CMS editing.

Assessment method

Facilitator observes three navigation tasks and asks why a missing action does not justify borrowing a colleague’s account.

S3 | 10:00–11:15 | Create, edit, upload and verify public visibility

Duration: 75 minutes. Target audience: All seven; ICT supports access only.

Learning objectives

Prepare one clearly marked draft; upload a safe image with meaningful alt text; describe verification/publication; show why an edit returns core content to draft.

Topics covered

Pages, News and notices, Media, Documents; slugs; categories; reference_date; publication states; expiry; exceptions; public view.

Teaching method and minute budget

Draft and upload demo 15 min; guided practice 45; publication/check-back demonstration 10; recap 5.

Live demonstration / verified fallback

Use a source-verified training record. Show draft → mark publishable/verify → publish with separately authorized publisher. For Documents use the Replace file action, not ordinary file editing.

Practical exercise

E2: Save/edit a draft Page if authorized; otherwise observe then use the worksheet. E3: Upload the supplied training image with descriptive alt text. Author an editorial draft where rights allow.

Required materials

Manual W4–W8; sample image; fictional text; approved author/verifier/publisher accounts; mail sink.

Expected competency

Participant saves or correctly plans a draft, supplies alt text and identifies all visibility conditions.

Assessment method

Check title/TRAINING marker, correct department, no personal data, saved state and expected citizen visibility. Blocked work stays pending.

B1 | 11:15–11:30 | Tea break

Duration: 15 minutes. Target audience: All seven.

Learning objectives

Return ready at 11:30.

Topics covered

Break and screen lock.

Teaching method and minute budget

15-minute break.

Live demonstration / verified fallback

None.

Practical exercise

Lock workstation; leave no credentials visible.

Required materials

Refreshments.

Expected competency

Safe pause.

Assessment method

Not assessed.

S4 | 11:30–12:45 | HR and Finance workflows with ICT support

Duration: 75 minutes. Target audience: 3 HR; 2 Finance; 2 ICT support both tracks.

Learning objectives

HR: draft/edit a vacancy and explain closing-day behavior. Finance: classify a fictional budget, set reference_date and use a version-preserving replacement. ICT: identify access and dependency blockers.

Topics covered

Vacancies and advert Documents; approved profiles; budgets and financial categories; public/private visibility; replacement; procurement boundaries.

Teaching method and minute budget

Common demonstration 15 min; parallel guided track work 45; peer verification 10; debrief 5.

Live demonstration / verified fallback

HR vacancy form and closing date; Finance document creation and Replace file. Facilitator alternates tracks; ICT supports navigation without changing permissions.

Practical exercise

E4 HR vacancy; E5 Finance budget/replacement; E6 ICT permission-review worksheet. Use paired observation while each person performs their own task.

Required materials

Role-specific exercise pages; two sample budget PDFs; approved fixtures/roles; manual W7–W12.

Expected competency

HR distinguishes saved advert from public vacancy; Finance preserves version history and interprets year; ICT can explain a denied action.

Assessment method

Track checklist with saved record ID/version/date or access-blocker evidence; separate individual scoring reserved for S7.

B2 | 12:45–13:30 | Lunch

Duration: 45 minutes. Target audience: All seven.

Learning objectives

Return at 13:30.

Topics covered

Break.

Teaching method and minute budget

45-minute break.

Live demonstration / verified fallback

None.

Practical exercise

Log out or lock workstation.

Required materials

Lunch.

Expected competency

Safe pause.

Assessment method

Not assessed.

S5 | 13:30–14:30 | Accounts, cybersecurity and data protection

Duration: 60 minutes. Target audience: All seven; technical detail emphasized for ICT.

Learning objectives

Identify three phishing indicators; distinguish account approval from least-privilege configuration; state an immediate incident response; explain safe handling of complaints and uploads.

Topics covered

Users/scopes; reset and optional MFA; strong unique passwords; phishing; private citizen/personnel data; Zimbabwe Cyber and Data Protection Act; AI data handling.

Teaching method and minute budget

Account/MFA concept demo 10 min; security/privacy explanation 15; scenario practice 20; teach-back and ICT account tabletop 15.

Live demonstration / verified fallback

Read-only user/scope view in isolated training if permitted. Show no passwords, recovery codes or real private records. Explain first/last-admin safeguards without exercising production changes.

Practical exercise

E7: suspicious “urgent budget approval” email and mistaken disclosure scenarios. ICT records an account-change request rather than making a real change.

Required materials

Scenario cards; manual W2, W13–W15; redacted user/scope screenshots pending; legislation references.

Expected competency

Each participant refuses credential sharing, limits public data and routes incidents immediately to the designated contact.

Assessment method

Participant names safe first actions and avoids deleting evidence or sending complaint data to AI services.

S6 | 14:30–15:15 | Maintenance, monitoring and troubleshooting

Duration: 45 minutes. Target audience: All seven; ICT leads operational teach-back.

Learning objectives

ICT: distinguish /up from worker/cron evidence; list DB/files/manifest/off-server/restore checks. HR/Finance: triage missing content, failed uploads and stale publications.

Topics covered

System health limitations; audit gaps; email operations; worker/cron; backups and restore; deployment/rollback ownership; support escalation.

Teaching method and minute budget

Monitoring demonstration or redacted evidence review 15 min; track tabletop 20; cross-track teach-back 10.

Live demonstration / verified fallback

Read-only reports if authorized; compare intended schedule to actual run evidence. Use backup manifest worksheet, not a production backup/restore or mail retry.

Practical exercise

E8: classify five incidents, identify owner/evidence, explain restore-to-scratch and safe escalation.

Required materials

ICT quick reference, operations evidence worksheet, maintenance SOP/runbook; no shell access required for HR/Finance.

Expected competency

Staff can provide a useful support report; ICT can identify unproven operational claims.

Assessment method

ICT explains three evidence checks; HR/Finance state expected status, attachment and permission checks.

S7 | 15:15–16:00 | Individual practical and knowledge assessment

Duration: 45 minutes. Target audience: All seven; role-specific tasks.

Learning objectives

Demonstrate eight track checkpoints independently and answer the post-test; record blocked tasks and remediation honestly.

Topics covered

Safe environment, task accuracy, publication dependencies, visibility/evidence, security and escalation.

Teaching method and minute budget

Instructions 5 min; individual track task 25; post-test 10; evidence capture 5. Facilitator samples each participant at checkpoints; ICT staff do not assess their own work.

Live demonstration / verified fallback

No teaching demonstration during scored tasks; clarify wording only.

Practical exercise

Use the individual variant in Assessment Materials. Practical 80 points + written 20; 70/100 proposed with all critical safety checks met.

Required materials

Individual sheets, assessment answer key held by facilitator, approved training fixtures, scoring workbook.

Expected competency

Role-relevant independent operation, or documented pending/remediation where not demonstrated.

Assessment method

Proposed scoring: 0/5/10 for each practical checkpoint; 2 per written question. Not assessed is blank, not zero. Council approves the rule before delivery.

S8 | 16:00–16:30 | Evaluation, questions and handover

Duration: 30 minutes. Target audience: All seven; Council sponsor if available.

Learning objectives

Identify support owner and next practice need; complete feedback; assign outstanding readiness actions without signing acceptance prematurely.

Topics covered

Feedback; assessment review; remediation; ownership; document locations; handover checklist.

Teaching method and minute budget

Feedback 10 min; questions and remediation 10; handover/action owners 10.

Live demonstration / verified fallback

Open package index, quick references, blank completion report and action register.

Practical exercise

Complete participant feedback; facilitator records results only after checking evidence; Council assigns missing contacts and due dates.

Required materials

Evaluation workbook, completion report, final checklist and delivery report.

Expected competency

Each participant can locate their reference and name an escalation route.

Assessment method

Feedback is not competence evidence; all registers remain blank until actual delivery.

Role track alignment

Track	Priority outcomes	Access limitation
ICT (2)	Roles/scopes, recovery, audit limits, monitoring evidence, backups and incident escalation	Host configuration, user changes, retries, restores and deployment are not authorized by this package.
HR (3)	Vacancy dates, drafts, authorized publication, advert dependencies and privacy	Default Department Content Owner has no vacancy/official authoring rights; rehearse G2.
Finance (2)	Budget category, reference_date, PDF review, version-preserving replacement and confidentiality	Default department role lacks documents.update/replacement; procurement/bank rights separate.

Assessment and remediation

S7: 5-minute briefing, 25-minute individual track task, 10-minute written post-test, 5-minute evidence capture. Practical has eight 10-point criteria scored 0/5/10; written test has ten 2-point items. Blank means not assessed. If any criterion is blocked, outcome is Pending rather than a completed score. Critical unsafe acts require remediation even if the aggregate reaches 70.

Keep the baseline separate from the final score. Record adjustments/accommodations and individual evidence without secrets. Results, training date, attendance and signatures remain blank until delivery. Council approves the threshold and any retest arrangements.

Evidence limits that must remain visible

• Authenticated administration walkthroughs and screenshots remain pending. Instructions are source-verified; per-role browser completion is not certified.

• HR vacancy rights and Finance document update/replacement rights are not assumed. ICT must test separately authorized training accounts; this package grants no permissions.

• Department-only create-policy entry checks may block creation even when a department role grants create. Stop and record the access blocker; do not grant blanket administrator access.

• Production PHP/database versions, cPanel application path, effective queue/cache/session drivers, worker supervision, cron execution, SMTP and hosting ownership remain unverified.

• Current backup scheduling, off-server copies, encryption, restoration rehearsal, external monitoring and delivery of alerts remain unverified. Historical rehearsal is not current evidence.

• Full mobile, keyboard, screen-reader and WCAG conformance checks, download integrity, all Shona/Ndebele pages and linguistic approvals remain outstanding.

• Publication gates vary: FAQs, bank accounts, settings, slides and statistics do not all use the standard lifecycle. Page verification filters are inconsistent; author/reviewer separation is recommended governance, not enforced independence.

• Generic delete/direct-save audit coverage, procurement attachment eligibility and Shield super-admin/custom-policy interactions need focused QA. No universal audit trail, recycle bin or exploitability is claimed.

• Announcement scheduling is not an available verified CMS workflow. Vacancy/tender public closure is date-derived; stored lifecycle may need reconciliation. Alt text is not universally enforced.

• AI/SMTP external services, complete legal compliance, approved privacy wording, support contacts, Council content acceptance and production role assignments are not verified.

• The approved audit describes a working tree with pre-existing changes, not a clean deployed release. No production edits, submissions, permission changes or hosting changes are authorized here.
